

Curriculum vitae

Name: István Dienes

Age: 36

Date of birth: 29.09.1970, **Place of birth:** Debrecen, Hungary

Address: 7. Zsigmond Ferenc street, Debrecen - 4033, Hungary

Cellular phone: 20-420-6173

Email: dienesistvan@yahoo.com

Qualification: Control and Information Technology Engineer

Résumé:

1994: BSc. in control and information technology engineering at University of Miskolc. I wrote my graduate thesis work on parallel programming of Transputer Systems in Occam 2 programming language, which was examined and graded excellent by the research members of the Hungarian Central Research Institute for Physics.

1994-95: Computer programmer at Rónahír Rt, Debrecen.

1995-99: Work-study programme, research on consciousness at MERU (Maharishi European Research University) in Seelisberg, Switzerland and at Maharishi Vedic University, in Vlodrop and Valkenburg, The Netherlands. At these private institutes beside working in the field of organisation I was doing theoretical research to develop my ideas regarding the physics of consciousness and to formulate a possible quantum information modelling of higher states of consciousnesses. At the same time I became a teacher of Maharishi Mahesh Yogi's Transcendental Meditation (TM).

1999-2004: Beside teaching TM in Hungary I worked as a translator and manager of my own company, **Aranykor Bt.** Its major profile was the translation of scientific (in the themes of physics, cosmology, biology, history), spiritual and religious, esoteric, natural healing etc. books from English into Hungarian. The company made translations for such well-known Hungarian publishing houses as Szukits, Alexandra, Kinizsi, Gold Book etc.

2003 I started an MSc. in Physics but I had to stop it because of my research and organisational works at the Institute for Strategic Research (ISR).

2004 - : Researcher at the Institute for Strategic Research, where I am in charge of managing the theoretical physics and consciousness research group. From 2004 on I am as well working on my theoretical researches on consciousness and wrote my book, *The Living Hologram*, which will be published by the institute in 2007. As part of my job in 2005 I organised *Physics of Consciousness* international conference, which was followed by the *Unified Theories* international conference and workshop in November 2006.

Conferences I have attended:

WFSF 19th World Conference and Budapest Futures Course 2005

World Academy of Biomedical Technologies – Central European Section. 17-19. August 2006.

E-Content Conference at Pozsony, 2006

Foreign language: English

Hobby: I like to read books, walking in nature, and consciously enjoy life in every way

Date: 01-10-2007, Debrecen, Hungary
